Unsure as to what training your staff need, We will look after the process of investigating, and designing a care training programme For use in your area.

During this process we will

- Prepare and undertake a specific training needs analysis for your staff, and prepare a report for you detailing our findings.
- Assess your staffs knowledge base and skills through interview and shadowing, and aid them to identify training gaps within their own knowledge
- Design and initiate a rolling training programme for your staff to address these needs.
- Advise on and develop an ongoing training plan for your staff to ensure they can maintain ongoing professional development.
